Velmont University

Prototype Academic Planning Guide

Sample planning document for Ask Velmont - not an official curriculum or degree plan

DEMO NOTICE: Final program names, curricula, credit requirements, course sequences, admissions requirements, and completion timelines are still being finalized. This document demonstrates the type of planning guide the agent can deliver.

University model used for this prototype

Educational model	Fully online university model.
Student reach	Designed for local and international learners.
Degree levels	Bachelor's and master's level study are planned.
Learning approach	Online learning with AI-supported, personalized learning concepts.
Program details	Final program portfolio and detailed curricula are still under review.

What a future official study plan should contain

- Official degree title and academic level.
- Total credit requirement and expected standard duration.
- Required core courses, electives, prerequisites, and capstone requirements.
- Recommended term-by-term or module-by-module sequence.
- Expected weekly study commitment and any synchronous requirements.
- Assessment methods, applied projects, and practical learning activities.
- Program learning outcomes and the skills students are expected to develop.
- Transfer-credit and prior-learning rules.
- Technology requirements for fully online study.
- Program-specific admissions and English-language requirements where applicable.

Prototype learner pathway

1. Choose a study level	Identify whether the learner is exploring bachelor's or master's study.
2. Explore an academic direction	Review the available or proposed academic areas once the final program portfolio is approved.
3. Review previous learning	Identify prior university study or relevant learning that may require formal evaluation.
4. Understand time and cost	Review the standard pathway and the approved cost information when available.
5. Build a personalized plan	Use advising and AI-supported guidance to understand an appropriate learning pathway.
6. Confirm the official plan	Use the final approved curriculum, policies, and admissions information before enrollment.

AI-supported learning concept

Velmont's prototype learning model presents AI as a support layer for learners: helping explain concepts, guide exploration, surface relevant learning resources, and support a more personalized learning path. The learner remains responsible for academic work, and final academic rules and integrity requirements must come from approved university policy.

How Ask Velmont can use this guide

For the prototype, Ask Velmont can offer this PDF when a visitor asks for a study plan, academic pathway, program structure, completion planning, or a downloadable overview of how academic planning will work.

Example agent message

"I can send you the current academic planning guide. It explains the planned structure of a study plan, but the final program curriculum is still under review. Would you like me to send it to your email?"

Important disclosure

This is not an official degree plan, course catalog, curriculum, admissions decision, or academic policy. It is a prototype document for demonstrating the website and Ask Velmont experience until the academic team publishes the approved program information.
